NOTICE OF INTENT

VERSION 2006

For Coverage Under 2006 Reissuance of NPDES General Permit GAR000000
To Discharge Storm Water Associated With Industrial Activity

Initial Notification (new facility) Previously Permitted (under 1998 Industrial SW permit) Change of Information (resubmittal by current permittee)

I. FACILITY LOCATION INFORMATION

FACILITY NAME: PHONE:

STREET/LOCATION ADDRESS:

CITY: COUNTY: ZIP CODE:

LATITUDE: LONGITUDE: (degrees; minutes; seconds)

MAILING ADDRESS: CITY: ZIP CODE:

II. FACILITY OWNER-OPERATOR INFORMATION

LEGAL NAME: PHONE:

MAILING ADDRESS:

CITY: STATE: ZIP CODE:

Publicly Traded Corporation Other Privately Owned Entity Governmental Entity

On-site Facility Contact: Name: Telephone Number:

Title:

III. SITE ACTIVITY INFORMATION

Storm Water Pollution Prevention Plan (SWP3) Developed? Yes No Implemented? Yes No\*

For facilities existing on or before the effective date of the permit, will the SWP3 be updated to be in compliance with the permit within ninety (90) days after the effective date of the permit? Yes No N/A (new facility)

\* Facilities that begin industrial activities after the effective date of the permit must implement and maintain a SWP3 in compliance with the permit on or before the date of commencement of industrial activity at the facility.

SIC CODES: Primary: Secondary:

AND/OR Hazardous Waste TSD Landfill Wastewater Treatment Power Generation

IV. STORM WATER DISCHARGE INFORMATION

1. Name of Receiving Waters:

2. Does the facility discharge storm water associated with industrial activity to, or within one (1) linear mile and inside the watershed of, any portion of an impaired stream segment listed as "partially-supporting" or "not supporting" designated uses on Georgia's most current 303(d) list? Yes No

3. If #2 answer was "Yes", indicate whether or not the pollutant(s) of concern for the impaired stream segment(s) may be exposed to storm water, as a result of current or previous industrial activity at the facility, during the term of this permit.

Yes No

Those facilities that answered yes to both #2 and #3 above must satisfy the requirements of Part III.C of the permit.

## Notice of Intent – Version 2006 (page 2)

Discharge to Municipal Separate Storm Sewer System (MS4)?  Yes  No MS4 Operator: \_\_\_\_\_

Other NPDES Permit Numbers: \_\_\_\_\_

Quantitative Data of Storm Water Discharges Available?  Yes  No Most recent year data collected: \_\_\_\_\_

### V. COMMENTS

**VI. CERTIFICATION:** I certify under penalty of law that this document and all attachments were prepared under my direction or supervision in accordance with a system designed to assure that qualified personnel properly gathered and evaluated the information submitted. Based upon my inquiry of the person or persons who manage the system, or those persons directly responsible for gathering the information, the information submitted is, to the best of my knowledge and belief, true, accurate, and complete. I am aware that there are significant penalties for submitting false information, including the possibility of fine and imprisonment for knowing violations.

Printed Name: \_\_\_\_\_ Title: \_\_\_\_\_

Signature: \_\_\_\_\_ Date: \_\_\_\_\_

## INSTRUCTIONS

Who must file a Notice of Intent (NOI) Form?

Certain private and municipally-owned industrial and commercial facilities are required to have a National Pollutant Discharge Elimination System (NPDES) permit for storm water (rain water) discharged to the waters of Georgia. The facilities required to have NPDES permits are identified in Title 40 Part 122 of the Federal Code of Regulations (40 CFR Part 122). This Notice of Intent is the “effective” application for the General NPDES Permit No. GAR000000 to be applicable to the facility identified in Section I. This General NPDES Permit is not applicable to process wastewater discharges or mixtures of process wastewater and storm water. You may wish to consult the applicable State and Federal rules, regulations, and laws prior to completing this NOI.

This Notice of Intent must be typed. Any NOI that contains illegible information will not be accepted. All information on this NOI must be submitted to be a valid notice. Information requested on the NOI that is not applicable to the owner-operator or the facility must be marked “N/A”. Please do not leave any blanks.

It is very important to read the permit carefully. If you have questions regarding NPDES Storm Water Permitting, contact the Storm Water Unit of the NonPoint Source Program at (404) 675-6240.

**Where to file: NOIs must be sent to:** Georgia Environmental Protection Division  
NonPoint Source Program  
4220 International Parkway, Suite 101  
Atlanta, Georgia 30354

**Section I. Facility Information:** Enter the facility’s name, street address, mailing address, county, and telephone number. Should the facility lack a street address, describe where the facility is located in “Section V. Comments.” Provide the latitude and longitude (in degrees, minutes, and seconds) of the approximate center of the facility to the nearest 15 seconds. This information can be obtained using a Global Positioning System (GPS) device, by consulting a United States Geological Service topographical map, or by accessing an internet mapping website such as <http://www.terraserver.com>.

## Notice of Intent – Version 2006 (page 3)

**Section II. Facility Owner-Operator Information:** Enter the owner-operator's legal name, mailing address and telephone number. Indicate by marking the appropriate block whether the facility is operated by a privately owned, publicly incorporated or a public entity. For public entities indicate whether the operator is a state, a federal, a local government or other public agency. Enter the name, title and telephone number of the individual who will serve as the on-site facility contact with day-to-day responsibility for storm water issues.

**Section III. Facility Activity Information:** All facilities covered by this permit are required to develop and implement a Storm Water Pollution Prevention Plan (SWP3) as specified in Part IV of the permit. List the primary 4-digit standard industrial classification (SIC) code that best describes the principal products or services provided by the facility identified in Section I. Also enter up to three additional SIC codes that identify secondary products or services. Mark the applicable block indicating whether this facility is: a hazardous waste treatment, storage, or disposal facility, including those operating under interim status or a permit under subtitle C of RCRA; a landfill, land application site, or open dump that receive or has received any industrial wastes, including those subject to regulation under subtitle D of RCRA; a treatment works treating domestic sewage or any other sewage sludge or wastewater treatment device or system, used in the storage, treatment, recycling, and reclamation of municipal or domestic sewage (design capacity of one (1) MGD); and/or a steam electric power generation facility, including coal handling sites.

### Section IV. Storm Water Discharge Information

Enter the name of the creek, stream, or river that receives the storm water discharge. The discharge of storm water from the facility may not necessarily go directly to the receiving waters but may go through a series of drainage ditches, swales, conduits, and similar structures or a municipally owned separate storm sewer system (MS4) before actually reaching the receiving waters. The name of the receiving waters may be found on a topographical map of your locality, a county map, or a similar map. Should your storm water be discharged to a municipal separate storm sewer system, the operator of the MS4 may be able to advise you as to the name of the receiving waters.

Determine if the facility discharges storm water associated with industrial activity to, or within one (1) linear mile and inside the watershed of, any portion of an impaired stream segment listed as "partially-supporting" or "not supporting" designated uses on Georgia's most current 303(d) list. Georgia's 303(d) list may be viewed on EPD's website at [www.gaepd.org](http://www.gaepd.org). Answer "Yes" or "No" to Question #2.

If the answer to Question #2 was "Yes" then indicate whether or not the pollutant(s) of concern for the impaired stream segment(s) may be exposed to storm water, **as a result of current or previous industrial activity** at the facility, during the term of the this permit. Those facilities that answer "Yes" to Questions #2 and 3 in Section IV must satisfy the requirements of Part III.C of the permit.

If the storm water is discharged to a MS4, then list the name of the operator of the MS4. This will usually be a city or county government.

List the permit numbers of any other individually issued NPDES permit applicable to this facility.

Indicate whether or not the owner-operator has existing quantitative data that represent the characteristics and concentration of pollutants in storm water discharges. Indicate which year the most recent data was collected.

**Section V. Comments:** Provide comments as appropriate.

**Section VI. Certification:** Provide the information requested and sign the NOI. Federal and State regulations require this NOI to be signed by one of the following people (signature by parties other than those below does not constitute a valid NOI submittal):

- For a corporation: by a responsible corporate officer. For the purpose of this permit, a responsible corporate officer means:
  1. A president, secretary, treasurer, or vice-president of the corporation in charge of a principal business function, or any other person who performs similar policy- or decision-making functions for the corporation; or
  2. The manager of one or more manufacturing, production or operating facilities, provided the manager is authorized to make management decisions which govern the operation of the regulated facility including having the explicit or implicit duty of making major capital investment recommendations, and initiating and directing other comprehensive measures to assure long term environmental compliance with environmental laws and regulations; the manager can ensure that the necessary systems are established or actions taken to gather complete and accurate information for permit application requirements; and where authority to sign documents has been assigned or delegated to the manager in accordance with corporate procedures;
- For a partnership or sole proprietorship: by a general partner or the proprietor; or
- For a municipality, state, Federal or other public facility: by either a principal executive officer or ranking elected official.
